## Excellent sunlight protection

### Free standing awning series 265

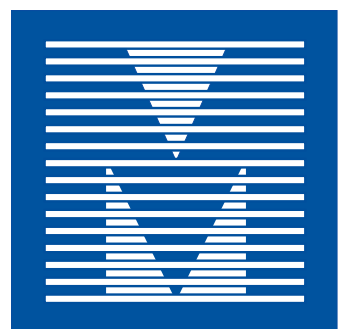

The 265 series free standing awning provides excellent sunlight protection up to 36m<sup>2</sup>. Its protection hood guarantees a protected awning cloth when the awning is folded up.

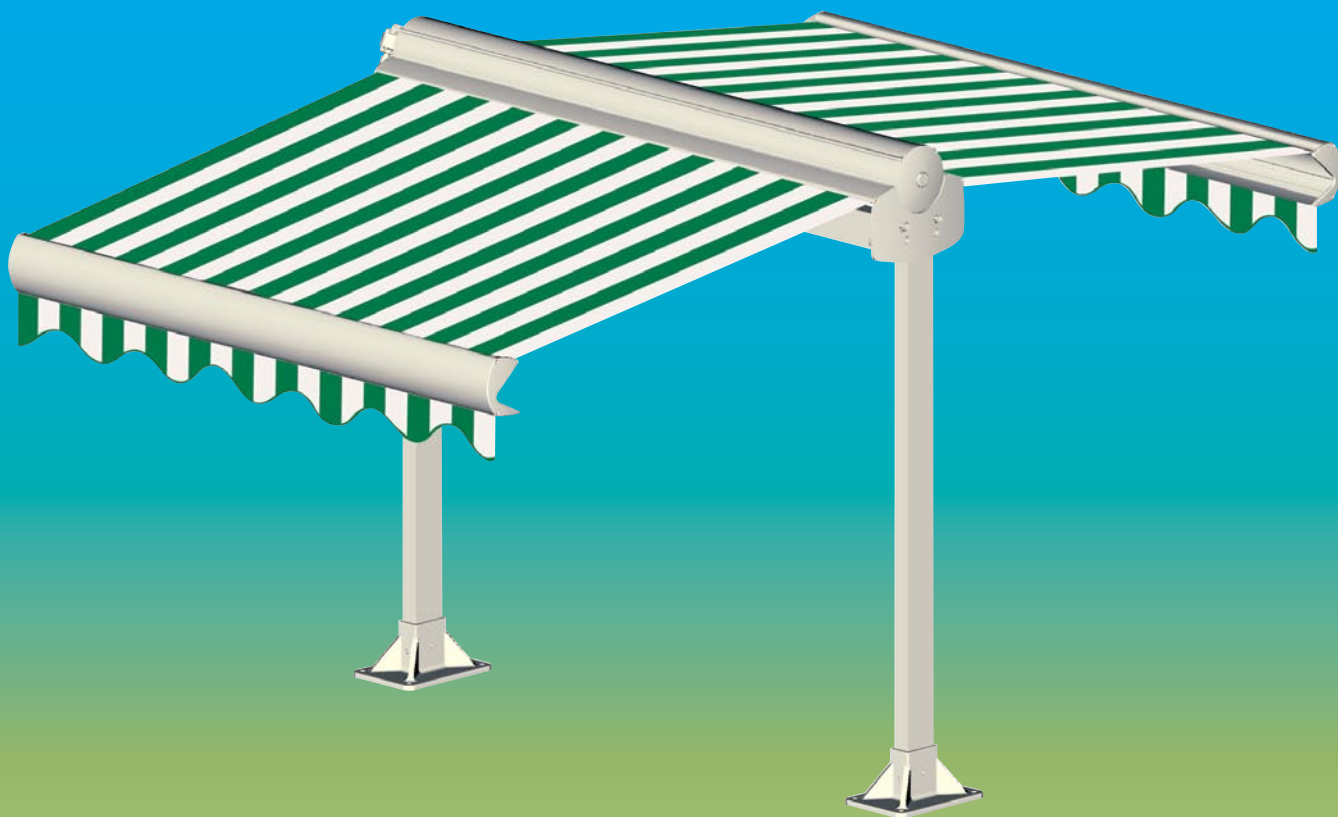

This awning is very easy to install and use : it is attached to the ground by two independent base feet.

A single mechanism – crank handle or motor winch – allows opening and closing the two sloping sections of the free standing awning. The awning cloth is symmetrically wound or unwound on either side of a roller tube by 4 high-resistance arms.

### ADVANTAGES :

- Excellent sunlight protection
- Stylish
- Very easy to install and use
