Wall installation

Its independent securing supports enable constraint-free installation. Mounting is easy and quick.

Overall dimensions :

Height : 175 mm

Width : 226 mm

Pitch adjustment :

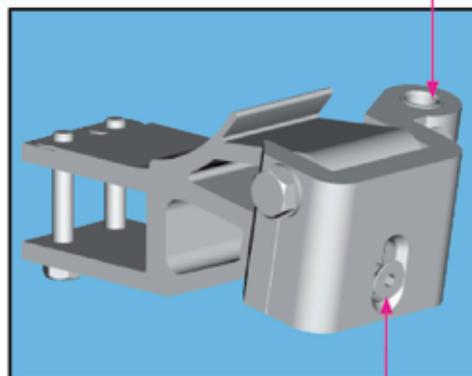

5° à 20°

Max. dimensions :

Width : 7,00 m

Projection : 3,50 m

Arm support attachment

Pitch adjusting screw

Arm support (0221)

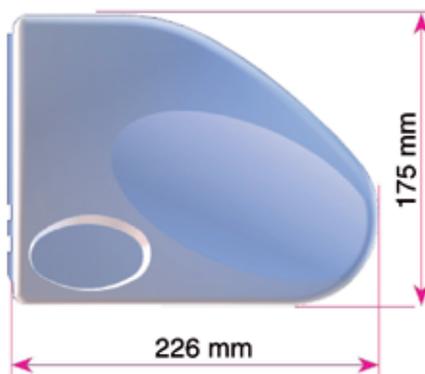

A very high-resistance part. The arm supports are removable and are directly attached to the cassette's self-supporting section.

Pitch adjustment

The awning is adjusted easily and precisely with only one adjusting screw.

Stylish

Its side elements (J225) perfectly integrate into all fixtures : cassette sections, roller tube support, crank handle or motor. A cap conceals all the fastening screws and highlights the case in a perfect harmony.

The front bar fastener enables fine adjustment of the heavy duty front bar allowing a perfect fit in the closed position.
